

ICE CONTROL EQUIPMENT

Trigger Valve Control Nozzle

Task Force Tips Impulse Trigger Valve System ice control nozzles have been specifically designed to apply water-, glycol-, or water/glycol-based ice control fluids to aircraft exterior surfaces at fluid temperatures up to 210°F (99°C). The proper use of deicing agents aids ground-support professionals in the removal of ice from aircraft fuselage, landing gear, and wing surfaces and helps prevent ice and snow from adhering to the wings of aircraft. This may extend holdover times and help make air travel in cold weather less hazardous. TFT nozzles are utilized worldwide by major passenger airlines, express package delivery companies, and military agencies and have set the standard for ice control nozzles.

5 Year Warranty 24 Hour Turnaround Factory Service 24 Hour Technical Hot-line: 800-348-2686

All Task Force Tips ice-control nozzles require a minimum of maintenance. However, should service be required, Task Force Tips provides 24-hour turnaround factory service and a 24-hour technical hot-line. Service kits are available upon request. Each Task Force Tips ice-control nozzle is shipped with a detailed manual and instruction booklet. Electric remote nozzles are shipped with wiring information.
